Prix Ibni Oumar Mahamat Saleh

Year 2022

Proclaim of the results

Anne Philippe, president of the Société Française de Statistique (SFDS)

Olivier Goubet, president of the Société de Mathématiques Appliquées et Industrielles (SMAI)

Fabien Durand, president of the Société Mathématique de France (SMF)

are pleased to announce that the Oumar Mahamat Saleh's Prizes 2022 have been awarded to

Ousmane KOUTOU   &   Winnie OSSETE

The **Ibni's Prize** was created in 2009 to honor the memory of Ibni Oumar Mahamat Saleh, Malian and politician in Tchad, in order to perpetuate his engagement to deliver a high quality training to young African mathematicians.

The Ibni Prize is awarded by a scientific committee set up jointly by our learned societies and CIMPA, the International Center for Pure and Applied Mathematics.

One or two persons are awarded every two years.

The funds are raised by a subscription. The IBNI 2022 Prize is also supported by the Fondation des Sciences Mathématiques de Paris and by the Institut Denis Poisson.

More information on how to apply for the prize and how it is awarded is available at
https ://www.univ-orleans.fr/prixIbni

————————————————————

Ousmane KOUTOU is from Burkina-Faso. He studied at the University of Nazi Boni (Bobo Dioulasso, Burkina Faso) where he defended a thesis in October 2020 in biomathematics under the supervision of Boureima Sangaré, entitled

Modélisation, analyse mathématique et contrôle optimal des maladies transmissibles : cas du paludisme, de la bilharziose et de la COVID-19.

He is currently assistant professor in the University Joseph KI-ZERBO à Ouagadougou.

Winnie OSSETE is from Congo. She studied in the university of Assane Seck, (Ziguinchor, Sénégal) where she defended a PHD thesis under the supervision of Salomon Sambou et Alain Yger, entitled :

A New Insight On Ronkin Functions Or Currents.

She is currently a temporary employee at the Faculty of Science and Technology of the Marien Ngouabi University in Brazzaville, Congo.
